EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This communication is an Examiner's reasons for allowance in response to application filed on September 02, 2003, assigned serial 10/652,929 and titled "RIDE CONTROL SYSTEM FOR ARTICULATED VEHICLES".

2. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

a. After carefully reviewing the application in light of the search of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.

b. Although the prior art disclose several claimed limitations, none of the references teaches a method and apparatus that applies to articulated vehicles which includes a tractor, a trailer having at least one independent antilock brake system, means for providing a ride control system with at least the driver's intention, a road conditions, an articulated vehicle behavior and other inputs when the articulated vehicle is in motion to determine whether or not erratic jackknifing is underway and determining the instantaneous orientation of the trailer with respect to the tractor, means for determining a probability of the trailer roll over based in part but not exclusively on the magnitude of the erratic jackknifing, and means for slowing down the left or right wheels of the trailer based on the instantaneous orientation of the trailer and the probability of trailer roll-over to drag the trailer on the side and force it to line up with the tractor (claims 1 and 5).

c. Claims 1-8 are allowable over the prior art of record.
